KRITVEE MODI

UI/UX DESIGNER

+91 9954815763 | kritvee11@gmail.com | Pune, Maharashtra, India | LinkedIn | Portfolio

UI/UX Design student with hands-on experience across UX research, interaction design, and visual/graphic design. Skilled at translating user needs and brand goals into structured, research-driven digital experiences and scalable design systems.

EXPERIENCE

Design Intern — 21n78e *June 2026 – July 2026*

- Designed 25–50+ social media creatives and campaign visuals across multiple client brands (healthcare, fintech, D2C, and finance sectors), ensuring consistency with each brand's visual identity and guidelines.
- Developed campaign concepts end-to-end, from ideation and moodboarding to final asset delivery, translating marketing briefs into cohesive, on-brand visual narratives.
- Structured carousel and story sequences with deliberate content flow and visual hierarchy, applying UX pacing and sequencing principles to graphic design work to improve viewer engagement.
- Prototyped an interactive scroll-based microsite concept in Framer, self-teaching motion and scroll-triggered interactions to expand beyond static design deliverables.
- Collaborated directly with design leads through fast, iterative feedback loops across multiple concurrent client accounts, adapting quickly to distinct brand voices under real deadlines.

PROJECTS

CapyGo — OCD Support App

- Designed a trigger-response system enabling users to manage OCD behaviors in real time through structured detection, grounding, and reward-loop flows.
- Reduced user anxiety through calm UI, micro-interactions, and guided actions, validated through iterative usability review.
- Built high-fidelity prototypes in Figma with clear interaction logic to communicate real-time behavioral flows.

Roop — Skincare Platform

- Designed end-to-end flows for skin analysis, product scanning, and personalized recommendations to simplify skincare decision-making.
- Addressed user confusion around product compatibility and routines by clarifying ingredient information architecture.
- Focused on culturally relevant, trust-building UX to improve clarity for first-time users.

Psychology of Loading — Perceived Loading Speed

- Investigated how visual feedback, motion, and animation influence users' perception of waiting time.
- Designed loading-screen concepts using visual storytelling to make waiting feel more engaging and intuitive.

EDUCATION

MIT Institute of Design — Bachelor of Design (B.Des) *2024 – Present*

Mayo College Girls' School — Higher Secondary Education *2016 – 2024*

- School Art President; 12th ISC — 94.5%

SKILLS

Interaction Design, Visual Storytelling, UX Research, Usability Testing, Wireframing, Prototyping, User Flows, Information Architecture, Design Systems, Micro-interactions, Behavioral Design, Accessibility, Graphic Design, Campaign Design

Tools: Figma, Framer, Adobe Photoshop, Adobe Illustrator, Miro, Procreate
